

How to Regenerate Your Permalinks in WordPress

When you regenerate your links, you are rebuilding and repairing the WordPress permalink structure. This may sound complicated but don't worry. You simply need to click on a button, and WordPress will handle the rest.

To get started, head over to **Settings » Permalinks** from your WordPress admin menu.

The screenshot shows the WordPress admin interface. On the left is a dark sidebar with a menu: Dashboard, Posts, Media, Pages, Comments, Appearance, Plugins, Users, Tools, Settings (highlighted), General, Writing, Reading, Discussion, Media, Permalinks, Privacy, and Collapse menu. The main content area is titled 'Permalink Settings' and has a 'Help' dropdown in the top right. Below the title is an introductory paragraph: 'WordPress offers you the ability to create a custom URL structure for your permalinks and archives. Custom URL structures can improve the aesthetics, usability, and forward-compatibility of your links. A [number of tags are available](#), and here are some examples to get you started.' The 'Common Settings' section contains six radio button options, each with a corresponding URL example: 'Plain' (http://localhost:10003/?p=123), 'Day and name' (http://localhost:10003/2022/03/03/sample-post/), 'Month and name' (http://localhost:10003/2022/03/sample-post/), 'Numeric' (http://localhost:10003/archives/123), 'Post name' (http://localhost:10003/sample-post/), and 'Custom Structure' (http://localhost:10003 /%postname%/). The 'Post name' option is selected. Below the 'Custom Structure' option is a text input field containing '/%postname%/' and a list of 'Available tags' in button-like boxes: %year%, %monthnum%, %day%, %hour%, %minute%, %second%, %post_id%, %postname%, %category%, and %author%.

This will take you to the WordPress Permalink Settings page. Here, you'll see the permalink structure that you are currently using.

To reset permalinks, just scroll to the bottom of the page and click on the 'Save Changes' button.

After a few moments, you should see a message confirming that WordPress has updated your permalink structure.
